Career Objective

A highly motivated individual looking for a MERN Stack Developer role to utilize my creativity, logical thinking, and dedication to continuous learning, thriving in a collaborative team setting to deliver innovative web solutions.

Skills

- **Frontend:** JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, DaisyUI, and dynamic UI libraries.
- **Backend & Database:** Node.js, Express.js, RESTful APIs with JWT, and MongoDB.
- **DevOps & Practices:** Git/GitHub, Firebase Authentication, Cloud Hosting (Firebase, Vercel, Netlify), API Integration, Responsive & Mobile-First Design.

Projects

LearnOsphere (Online Course Platform)

[Live](#), [Client Code](#), [Server Code](#)

Description: A comprehensive MERN stack online learning platform for instructors and students.

Key Features:

- Well-Structured Search and Filter: Implement keyword, category, and advanced filtering for courses.
- Course Rating System: Allow users to submit star ratings and text reviews.
- Secure API: Use HTTPS, authentication (OAuth/JWT), input validation, rate limiting.

Technologies: React, Node.js, Express.js, MongoDB, Firebase, JWT, Tailwind CSS.

Root Rhythm (Plant Care Platform)

[Live](#), [Client Code](#), [Server Code](#)

Description: A MERN stack web application serving as a digital plant care assistant.

Key Features:

- Personalized Plant Profiles: Create custom profiles for each plant with species, photos, and care notes.
- Detailed Watering Logs: Record dates, amounts, and methods of watering for each plant.
- Comprehensive Health Tracking: Monitor plant growth, identify issues, and log treatments.

Technologies: React, Node.js, Express.js, MongoDB, Firebase, DaisyUI, Tailwind CSS.

TopiCrowd (Forum Application)

[Live](#), [Client Code](#), [Server Code](#)

Description: A MERN stack forum for community discussion. It includes robust features for user and content management.

Key Features:

- **Full-stack User Authentication:** Implemented secure user registration and login with Firebase on the front end and JWT for secure, cookie-based sessions on the back end.
- **Content Management System:** Enabled users to create interactive posts with rich-text editing, commenting, and voting.
- **Stripe Integration:** Integrated Stripe to handle payments for premium memberships.

Technologies: React, Node.js, Express.js, MongoDB, Firebase Authentication, Stripe, JWT, Tailwind CSS.
